

There's Only One Red Rhino.®

In the growing jungle of die ejection materials, one system stands out: **Red Rhino**. It's one tough MicroCell material that can do the work of two or more materials.

Life Expectancy: 1,000,000+ cycles at 50% compression

Thickness Tolerance: ±.015

Presses: High speed as well as hand-fed

Versatility: Provides the quick kick needed for thin substrates, yet high compressibility for thicker substrates

Low compression set

Pricing: Less than comparable materials

Red Rhino
"None Tougher"

Available in sheets, pads, strips, E-Z Set,[™] Side Wave,[™] Ejectoflex,[™] and Kiss Kut pieces. Contact us for a **FREE** sample or for a **FREE** Rubber Selector Guide.
