

## Monroe Rubber & Plastic Material Order Reference Guide

When ordering sidewave, ejectoflex or mr point specify the dimensions of the strip in the following sequence:

A = HEIGHT OF STRIP (**MATERIAL THICKNESS**)

B = WIDTH OF STRIP (measured at widest point)

C = LENGTH OF STRIP

Example: When ordering a strip with a 3/8" height, 1/2" width, and 18" length, specify as follows:

A = 3/8" HEIGHT OF STRIP (**MATERIAL THICKNESS**)

B = 1/2" WIDTH OF STRIP

C = 18" LENGTH OF STRIP

In this example the Rubber strip is specified as follows: 3/8" x 1/2" x 18"
